About Me

Machine Learning Professor at the National University of Luján (UNLu), with postgraduate studies in data intelligence and natural language processing (NLP). My academic activity focuses on open language models and their adaptation to specific domains.

My thesis work, "Efficient Adaptation Strategies for Open Language Models", compares full fine-tuning (FFT), PEFT techniques (LoRA, QLoRA, DoRA, and QDoRA), and GaLore on *Transformer*-based models, through experiments in the Clementina XXI HPC environment.

I also have over 25 years of IT experience, especially in the administration and optimization of Oracle databases, networks, and Linux/Windows systems.

Education

- 2026 **Master in Data Intelligence Oriented to Big Data, UNLP.**
- 2023 **Specialization in Data Intelligence Oriented to Big Data, UNLP.**
- 2022 **Bachelor in Computer Science, UNLP.**
- 2011 **Computer Analyst, UNLP.**

Publications

Conference Papers

- 2026 **Malek Camilo, Juan Manuel Fernández, Marcelo Errecalde**, Performance vs. Efficiency in Domain-Specific LLM Adaptation: A Comparative Study of Full Fine-Tuning and LoRA on Real-World Data, *In the proceedings of the XIV Jornadas de Cloud Computing, Big Data & Emerging Topics (JCC-BD&ET)*.

Poster

- 2026 **Malek Camilo, Juan Manuel Fernández, Marcelo Errecalde**, Parameter Efficiency or Efficient Full Fine-Tuning?, *Poster presented at Second South American NLP School (SANLPS 2026)*.

Journal Articles

- 2026 **Malek Camilo, Juan Manuel Fernández, Marcelo Errecalde**, Advanced PEFT Methods in Domain-Specific LLM Adaptation: An Empirical Comparison Involving LoRA, DoRA, QLoRA, and QDoRA, *Article under review in the journal Journal of Computer Science & Technology (JCS&T)*.

Experience

- September 2026 – Present **Head Teaching Assistant**, *Universidad Nacional de Luján*.
Computing Division, Department of Basic Sciences.
 - Machine Learning.
 - Capstone Project.
- October 2017 – Present **Oracle Database Administrator**, *Poder Judicial de la Nación Argentina*.
Magistrates Council, General Directorate of Technology.
 - Administer installation, configuration, patching, upgrades, tuning, and incident resolution on Oracle 11g and 19c databases.
 - Deploy and maintain Oracle Enterprise Manager (OEM) 13c infrastructure.
 - Implement and manage high availability and disaster recovery environments using Oracle Data Guard.
 - Plan and execute periodic database engine *upgrades* (including migrations from 11g to 19c).
- November 2010 – September 2017 **Database and Systems Administrator**, *Universidad Nacional de La Plata*.
CeSPI
 - Managed Oracle database environments, planning and executing upgrades, migrations, and scheduled maintenance.
 - Installed, configured, and resolved operational incidents in physical hardware infrastructures and virtualized environments.
 - Administered network topology, Linux server clusters, and virtualization platforms (Oracle VM, Xen, Linux KVM).

- November 2010 – **Oracle Database Administrator**, *Senasa*.
 - o Migrated the production database from PostgreSQL to Oracle.
- September 2017 – **Oracle Database Administrator**, *Senasa*.
 - o Executed the Oracle database *upgrade* from version 11g to 19c.
 - o Migrated the database architecture from traditional environments (non-CDB) to multitenant architecture (CDB/PDB).
 - o Installed, configured, applied patches, optimized (*tuning*), and resolved operational incidents on Oracle 11g and 19c databases.
- November 2007 – **Systems and Network Administrator**, *Otero Hogar*.
 - o Ensured inter-branch network connectivity by managing *routers*, point-to-point wireless links, and VPN tunnels.
- October 2010 – **Systems and Network Administrator**, *Otero Hogar*.
 - o Administered the operation of servers and infrastructure services, including mail servers, domain controllers, *firewalls*, and *proxies*.
- September 2008 – July 2009 – **Instructor**, *Buffa Sistemas S.R.L.*.
 - o Taught the Linux Systems Administrator training course.
- September 2004 – **Systems, networks and support**, *Internet Winds AG SA*.
 - o *Systems and Network Administrator (October 2006 - October 2007)*
 - o Administered the Network Operations Center (NOC) and installed, configured, and maintained the wireless internet provider's infrastructure, including nodes, links, *switches*, and *routers*.
 - o *Help Desk Coordinator (October 2005 - September 2006)*
 - o Coordinated the help desk, acting as a technical and operational liaison with the NOC.
 - o *Help Desk Technician (September 2004 - September 2005)*
 - o Resolved technical incidents and managed customer requirements.

Skills

- Data Science & AI NumPy, Pandas, Seaborn, Scikit-learn, TensorFlow, PyTorch, Keras, spaCy, Hugging Face Transformers, Spark, Hadoop, PEFT, GaLore.
- HPC Workload orchestration using Slurm in supercomputing environments like Clementina XXI.
- Management
- Databases Oracle DB, Oracle Data Guard, Oracle Exadata, Oracle RAC, Oracle EM, Oracle Data Pump, ETL, PostgreSQL, MongoDB.
- Networking Routing, Firewall, Enlaces, VPN, Proxies, BGP, QoS.
- OS GNU/Linux, Windows Server.
- Programming C, Python, SQL, PL/SQL, Bash Scripting.

Courses

- 2011 **Oracle Databases Advanced Level**, *Fundación PROYDESA*.
- 2011 **Oracle Databases Intermediate Level**, *Fundación PROYDESA*.
- 2010 **Oracle Databases Entry Level**, *Fundación PROYDESA*.

Languages

- English Advanced
